Product Data

MODEL
CG7200H

The CG7200H is a keyboard operated phototypesetting unit designed for fast, accurate production of top quality display lines. The unit's keyboard features light "electric typewriter" touch and is easily adaptable to standard typing skills. The CG7200H is remarkably simple to operate and maintain, and operator training time is minimal. Each font strip contains superior figures and commonly used pi characters. Direct keyboard kerning eliminates costly cutting time. A line measure display counter is available as an option. The Model CG7200H is the finest, fastest display phototypesetter at the lowest possible price and offers eight type sizes from 30 point to 120* point.

* 96 & 120 point caps only
